## 50 Hz SINGLE-PHASE WELDING CONTROLLER TYPE MPS

Welding controller type 200

Welding controller type 300

Thyristors

- 8 weld schedules.
- Running with 3 modes :
  - Configuration mode
  - Programming mode
  - Counter (of welds) mode
- Programming of welding time in periods or half-periods.
- Current regulation on the secondary circuit. Programming of the intensity in kA.
- Welding current monitoring with mini / maxi limits setting.
- Display unit in :
  - English language
  - French language
  - German language
- 
- Thyristors for 50 Hz single-phase transformer, up to 125 kVA.
- Water cooling.
